I am a junior programmer with experience in Java and Java Spring Boot, JavaScript with React and Node.js, and databases such as MySQL and MongoDB. I have knowledge of CSS design (Astro, Tailwind) and version control using Git, which enables effective collaboration within development teams. Additionally, I have skills in technical support and equipment maintenance, including domain configuration, preventive computer maintenance, and troubleshooting technical issues. I am seeking an opportunity to apply and expand my knowledge in programming and support, contributing to the company's growth while learning from each new challenge.

WORK EXPERIENCE

IT Support / Junior Developer | In Comicion Presidencial de Gubierno Abierto Y Electronico(GAE),

*Septiembre 2024 -
Noviembre2024*

During my time at the Presidential Commission for Open and Electronic Government (GAE), I developed my junior programming skills by creating a web-based application to record attendance and generate reports for the Human Resources department. In addition, I strengthened my technical support skills, including operating system installation, integration into the company domain, and preventive maintenance of most of the commission's computers.

Vacacionista| La Torre

*noviembre 2023 -
enero 2024*

During this period, I developed my communication and interpersonal skills by constantly interacting with customers and coworkers, which also strengthened my ability to work as part of a team. I performed in various assigned areas, including roles such as Sales Packer, Gift Packer, Warehouse Assistant, and Grocery Assistant for both food and non-food products.

Additionally, my strong performance was recognized when I was requested to continue for an additional week after the completion of my contract. Through this experience, I gained a valuable first exposure to the professional work environment, allowing me to understand workplace dynamics and effectively apply my skills across different tasks.
